

## **Session Program**

**Nov 15 - 19, 2021**

# **MT27, 27th International Conference on Magnet Technology**

## ***WED-SS Special Session "Lesson learned"***

Fukuoka Convention Center

## Wed, November 17

6:25 PM

### WED-SS Special Session "Lesson learned"

**Session** | **Location:** Fukuoka Convention Center | **Conveners:** Pierluigi Bruzzone, Satoshi Awaji

18:25 - 18:30 **Introduction**

**Speaker**

Pierluigi Bruzzone

18:30 - 18:50

**[Invited] Successes & Failures in Design Solutions During the 30 Year Life of ITER (and how we could have improved)**

**Speaker**

Neil Mitchell

18:50 - 19:10

**[Invited] Lessons Learned in the Development of Accelerator Magnets based on Nb<sub>3</sub>Sn and HTS**

**Speaker**

Stephen Gourlay

19:10 - 19:30

**[Invited] Lessons learnt in HL-LHC interaction region superconducting magnets: two case studies**

**Speaker**

Dr Ezio Todesco

19:30 - 19:50

**[Invited] Some Lessons Learned During 27 Years Operating Above 27 Tesla.**

**Speaker**

Mark Bird

19:50 - 20:10

**[Invited] Lessons Learned in No-insulation HTS Magnet Technology**

**Speaker**

Seungyong Hahn

20:10 - 20:30

**[Invited] Bringing a Nuclear Quality Approach to Superconducting Magnets**

**Speaker**

Liao Min

8:30 PM
