## **LHC machine scenario for a short oxygen run**

*Thursday, February 4, 2021 3:00 PM (30 minutes)*

This talk discusses scenarios for a short oxygen run in the LHC in terms of needed commissioning, machine constraints, beam parameters, and estimated luminosity performance. Both O-O and p-O collisions are discussed.

**Presenter:** Dr BRUCE, Roderik (CERN)

**Session Classification:** Light-ion beams at the LHC
