

CASTOR SRM Outstanding Issues

Shaun de Witt
s.de.witt@rl.ac.uk

PrepareToGet

- Handling Get requests without space token
 - Currently you get space based on retentionPolicyInfo or default
 - Moving to selecting space based on:
 - retentionPolicyInfo
 - accessPattern/processing mode
 - Existing accessible on-line copy
 - default

Copy

- This should be working in current release.
 - Own testing showed it worked fine
 - Not working under s2
 - Needs investigation

ChangeSpaceForFiles

- Design Agreed
- Ready asap

PurgeFromSpace

- Design agreed

Bugs, features and user problems

- Always ongoing
- Release Mechanism needs improving
 - Database hotfixes not in release at moment
 - Better Numbering covention agreed on
 - X.Y-Z
 - X -> Major functional change, schema change
 - Y -> Castor client library version required
 - Z -> bugfix release
- Support Model at remote sites
- New Releases detailed on twiki:
 - <https://twiki.cern.ch/twiki/bin/view/FIOgroup/SrmV22Deployment>
