

## Working with CMS Open Data: a report from the first hands-on workshop

*Wednesday 17 February 2021 16:30 (20 minutes)*

Championing CERN's efforts in open science, the CMS Collaboration has released a large portion of the LHC's Run 1 data to date. In this presentation, we report on the first CMS Open Data Workshop held remotely last year, the tools used therein and the feedback obtained. In addition, the current status and plans are reviewed in adherence to the new, revitalized CERN open data policy.
