This is the first announcement of the sixth international Workshop On Nuclear Data Evaluation for Reactor applications (WONDER-2021). This workshop will take place at Aix-en-Provence downtown (France).

It will start on Monday 21st of June (noon) by a lunch + registration and will end on Friday, 25th of June (2.00 pm), after lunch.

Website of Wonder-2021

WONDER-2021 is the continuation of a series of workshops held in 2006, 2009, 2012, 2015 and 2018 (Proceedings WONDER). Organized by the French Alternative Energies and Atomic Energy Commission (CEA, Cadarache Center), it will be held in Aix-en-Provence (France), at the Aquabella Hotel (to be confirmed).

The main objective of the workshop is to review and discuss the recent experimental progress and the improvements of modeling and evaluation methods of nuclear data for reactor applications (operational and future nuclear installations).
Topics

The following topics will be discussed:

- Microscopic and integral measurements
- Evaluation of nuclear data (theory, models, codes)
- Decay data and delayed neutron
- Thermal scattering laws
- Nuclear fission, including prompt particle emission and fission yields
- Uncertainties and covariance matrices (methodology and impact on reactor calculations)
- Processing and benchmarking

Fees

The workshop fee is 450 €, covering:

- Five workshop lunches,
- Coffee breaks,
- The dinner of the Workshop (planned on Wednesday, 23rd of June evening),
- A visit of the CEA-Cadarache facilities (to be confirmed, on Wednesday afternoon)
- The proceedings of the conference.

An extra (50€/person) is required for accompanying people to the conference dinner.
