

16th Workshop on Advanced Silicon Radiation Detectors Trento, 16-18 February 2021

THE WORKSHOP

Continuing in its tradition, the goal of the workshop is to bring together experts on sensor technology (design and processing), front-end electronics, system issues, detector applications (e.g., particle tracking, medical and biological imaging), etc. for discussions of the present state of the art, establishment of requirements of the fields and future programs.

The workshop will consist of invited talks and contributed oral presentations, also hosting a Topical Session on 3D integration technologies.

Due to the Covid-19 pandemics, the Workshop will be virtual. Connections will be managed by Microsoft Teams, information will be provided to registered attendees in due time.

TOPICS

- Design and Simulation
- Fabrication Technologies
- Radiation Hardness
- Read-Out
- System Issues
- Applications

ORGANIZING COMMITTEE

Maurizio Boscardin, FBK (Italy)

Gianluigi Casse, FBK (Italy) and Univ. Liverpool (UK)

Gian Franco Dalla Betta, University of Trento (Italy)

Hartmut F. -W. Sadrozinski, SCIPP, UCSC (USA)

Yoshinobu Unno, KEK (Japan)

CONTACTS

- boscardi@fbk.eu
- gianfranco.dallabetta@unitn.it
