

Network Activities -WP04 Roadmap and pre-design of future irradiation facilities

Thursday 20 May 2021 11:20 (20 minutes)

The objective of this WP is to define roadmaps and provide recommendations for upgrades of current facilities and design of future ones. The WP4 goal is to underline long-term scientific, technological and industrial needs in order to prepare irradiation facilities and improve the usability of them. This task is addressed by analyzing the present and future industrial and scientific applications and investigating the limitations of the current facilities. In turn, the aim is also to propose technologically advanced solutions that can be used to tackle long-term requirements.

Presenters: DANZECA, Salvatore (CERN); VERSACI, Roberto (ELI Beamlines)

Session Classification: RADNEXT Kick-off meeting
