(I) (Lunch session talk) NRC's Quantum Sensors Challenge Program

Tuesday 8 June 2021 14:40 (20 minutes)

The National Research Council is launching The Internet of Things: Quantum Sensors Challenge Program in 2021. This program has seven years of funding and aims to develop a disruptive generation of quantum sensors that are orders of magnitude better than sensors that exist today. The program is structured to encourage collaborative research projects between the NRC and researchers in academia, industry, and other government departments. This talk will discuss program details and review the collaborative model.

Primary author: MASON, Peter (National Research Council of Canada)

Co-author: KAY, Phil (National Research Council of Canada)

Presenter: MASON, Peter (National Research Council of Canada)

Session Classification: TS-7 Sensors and Metrology Symposium (NRC) / Symposium sur les capteurs et la métrologie (CNRC)

Track Classification: Symposium Day (NRC) - Physics for the next generation of sensors and metrology (NRC)
