EOS for CERNBox report

Wednesday, 3 March 2021 15:00 (20 minutes)

EOS provides the backend to CERNBox, the cloud sync and share service implementation used at CERN. EOS for CERNBox is storing 12PB of user and project space data across 9 different instances running in multi-fst configuration. This presentation will give an overview of 2020 challenges, how we tried to address them and talk about the roadmap for the service for 2021.
