

Session Program

19-20 Jul 2010

RD51 mini week

WG2: Physics issues

CERN, 13/2-005

Tuesday 20 July

14:00

WG2: Physics issues

Session | **Location:** CERN, 13/2-005

14:00–14:20

First results from the double phase argon LEM-TPC with a projective 2D anode

Speaker

Filippo Resnati

14:20–14:40

The study of TGEMs and RETGEMs for the possible ALICE RICH upgrade

Speaker

Himank Anand

14:40–15:00

Use of GEM for hadronic calorimetry at ILC

Speaker

Prof. Jaehoon Yu

15:00–15:20

20 ps time stamping with Multigap RPC

Speaker

Crispin Williams

15:20–15:40

Space Charge Effects in TPCs

Speaker

Jim Thomas

15:40
