

**Session Program**

**19-20 Jul 2010**

**RD51 mini week**

***WG2: Physics issues***

CERN, 13/2-005

## Tuesday 20 July

14:00

### WG2: Physics issues

Session | Location: CERN, 13/2-005

14:00–14:20

#### First results from the double phase argon LEM-TPC with a projective 2D anode

**Speaker**

Filippo Resnati

14:20–14:40

#### The study of TGEMs and RETGEMs for the possible ALICE RICH upgrade

**Speaker**

Himank Anand

14:40–15:00

#### Use of GEM for hadronic calorimetry at ILC

**Speaker**

Prof. Jaehoon Yu

15:00–15:20

#### 20 ps time stamping with Multigap RPC

**Speaker**

Crispin Williams

15:20–15:40

#### Space Charge Effects in TPCs

**Speaker**

Jim Thomas

15:40
