

When CERNBox met Agile

Hugo Gonzalez Labrador

Project Lead and Service Manager, CERNBox

CERN IT Storage

PMMU 9th March 2021

Me

Galician (from Spain)

Msc Computer Engineering

I like diving in cold lakes

- Software Developer
- Aerospace
- Pentas (Humsat constellation)

- Technical Student
- Fellow
- Staff

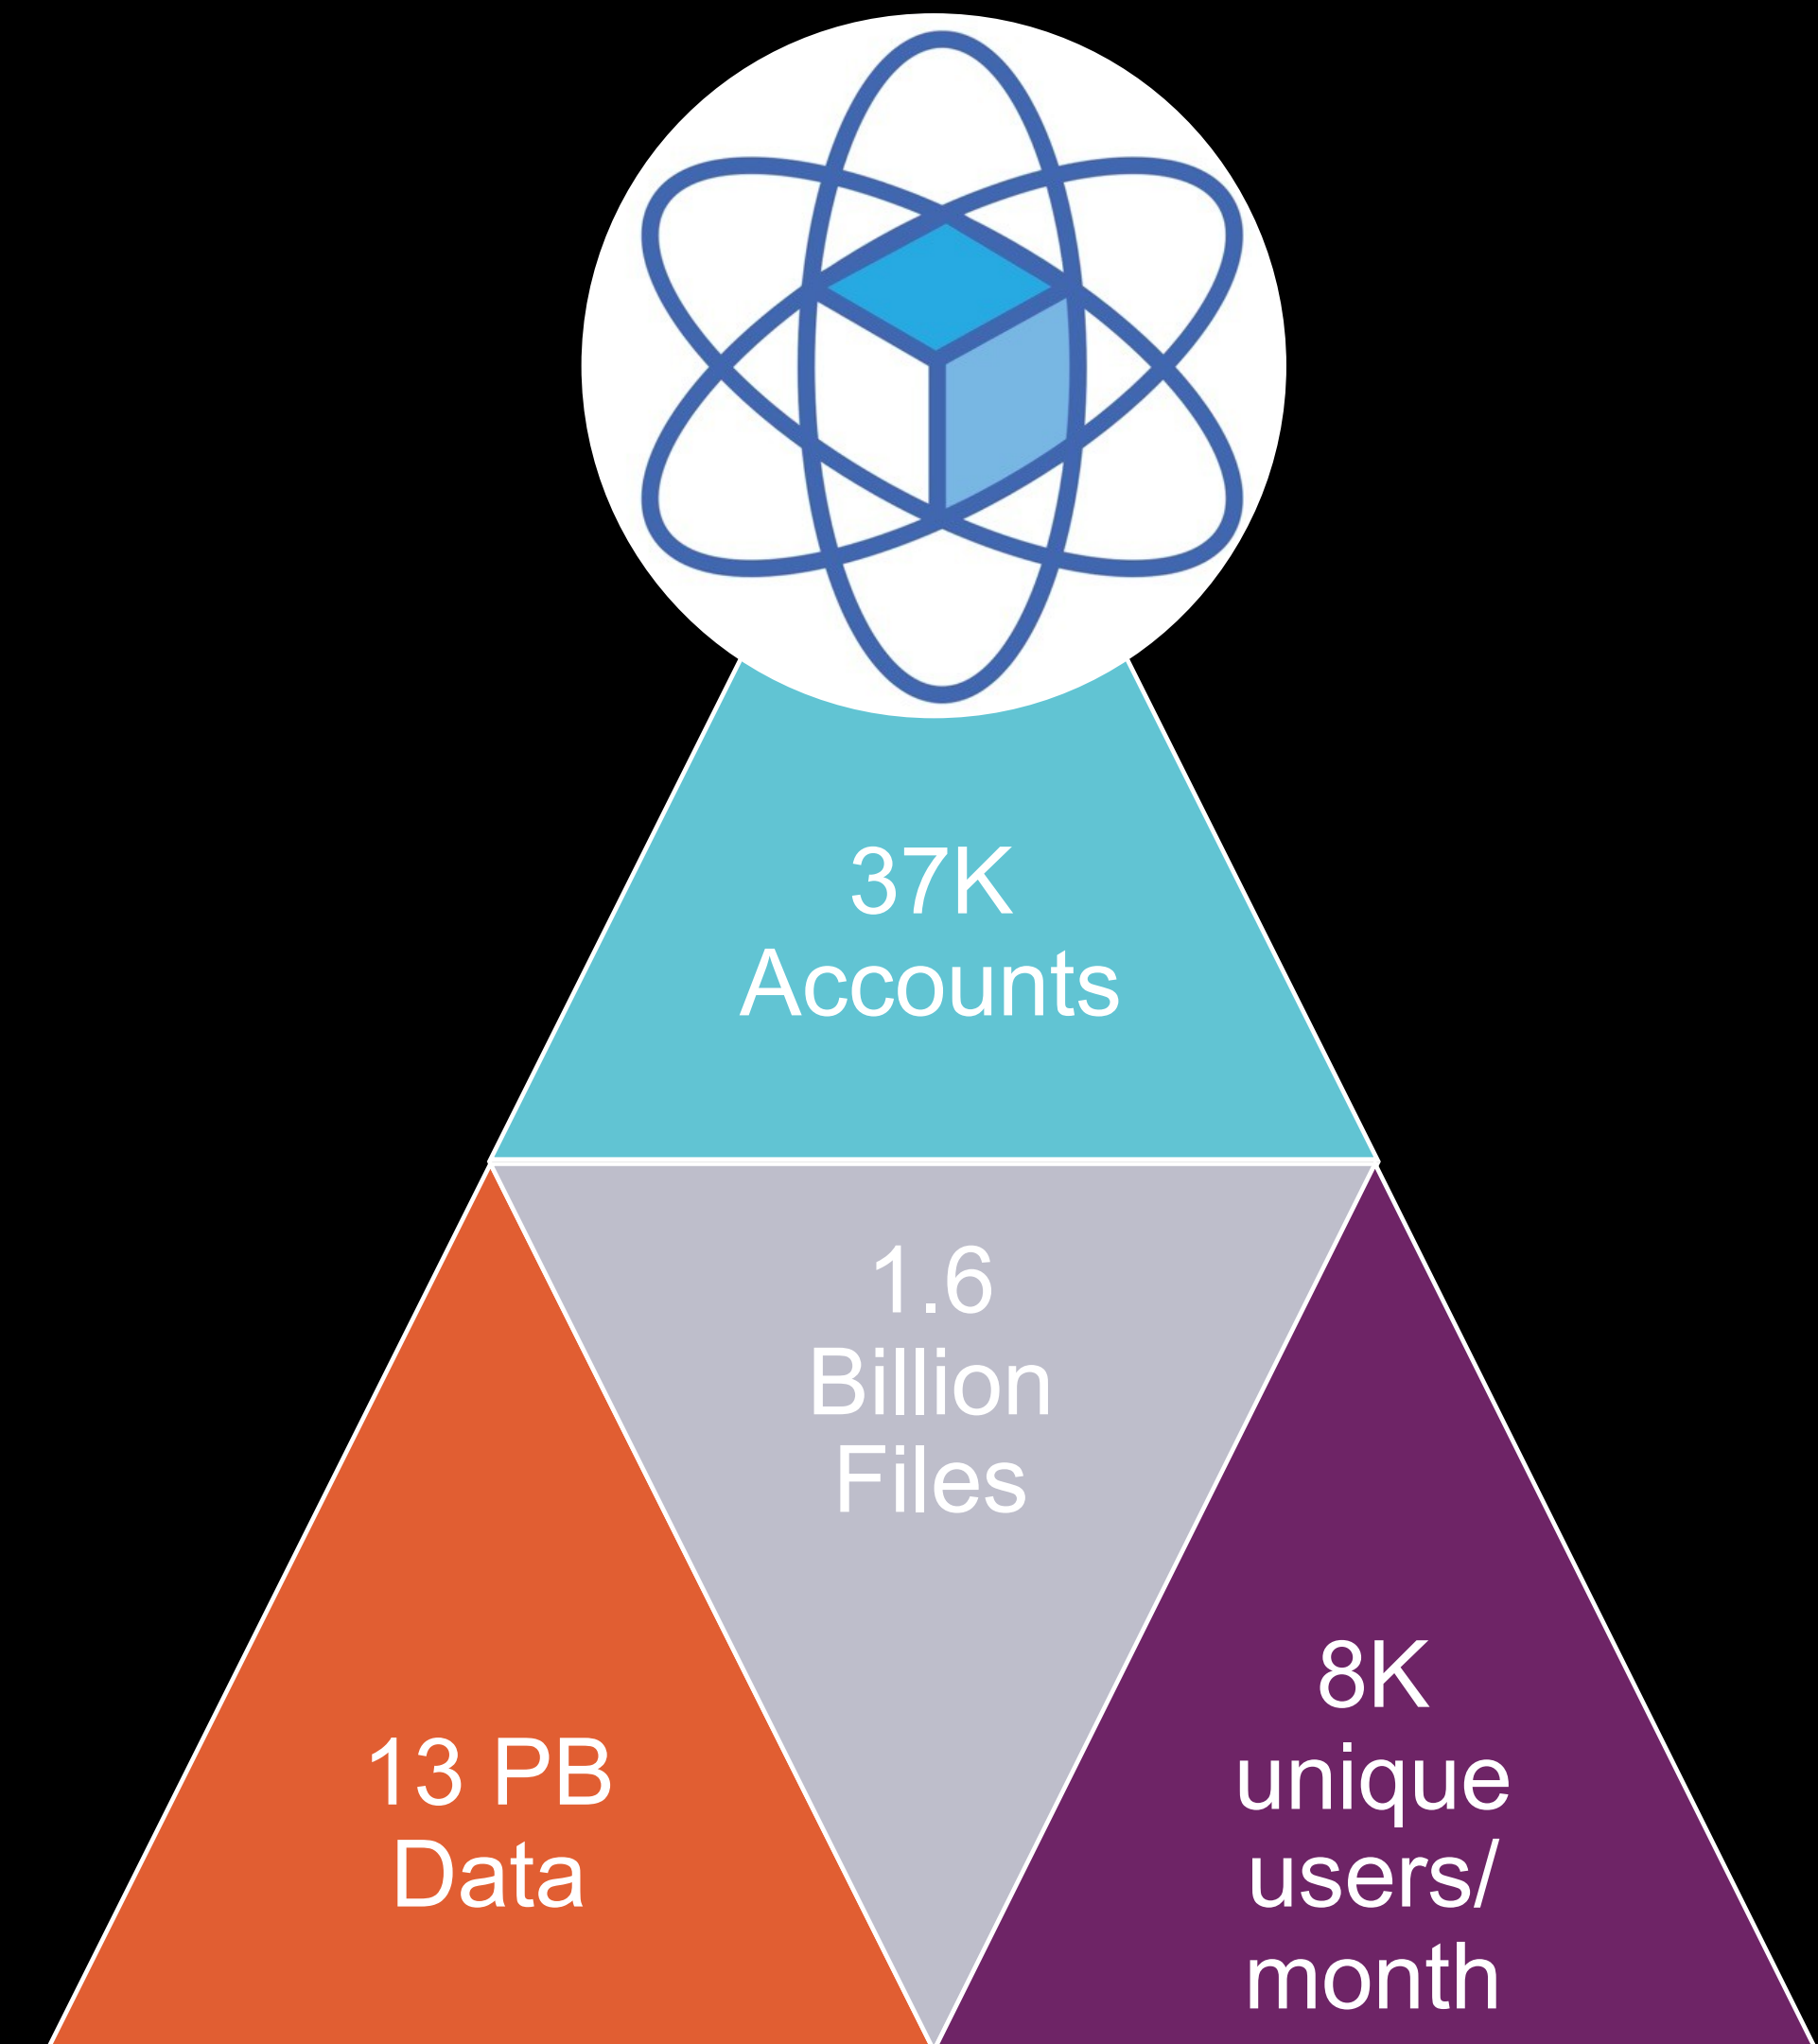

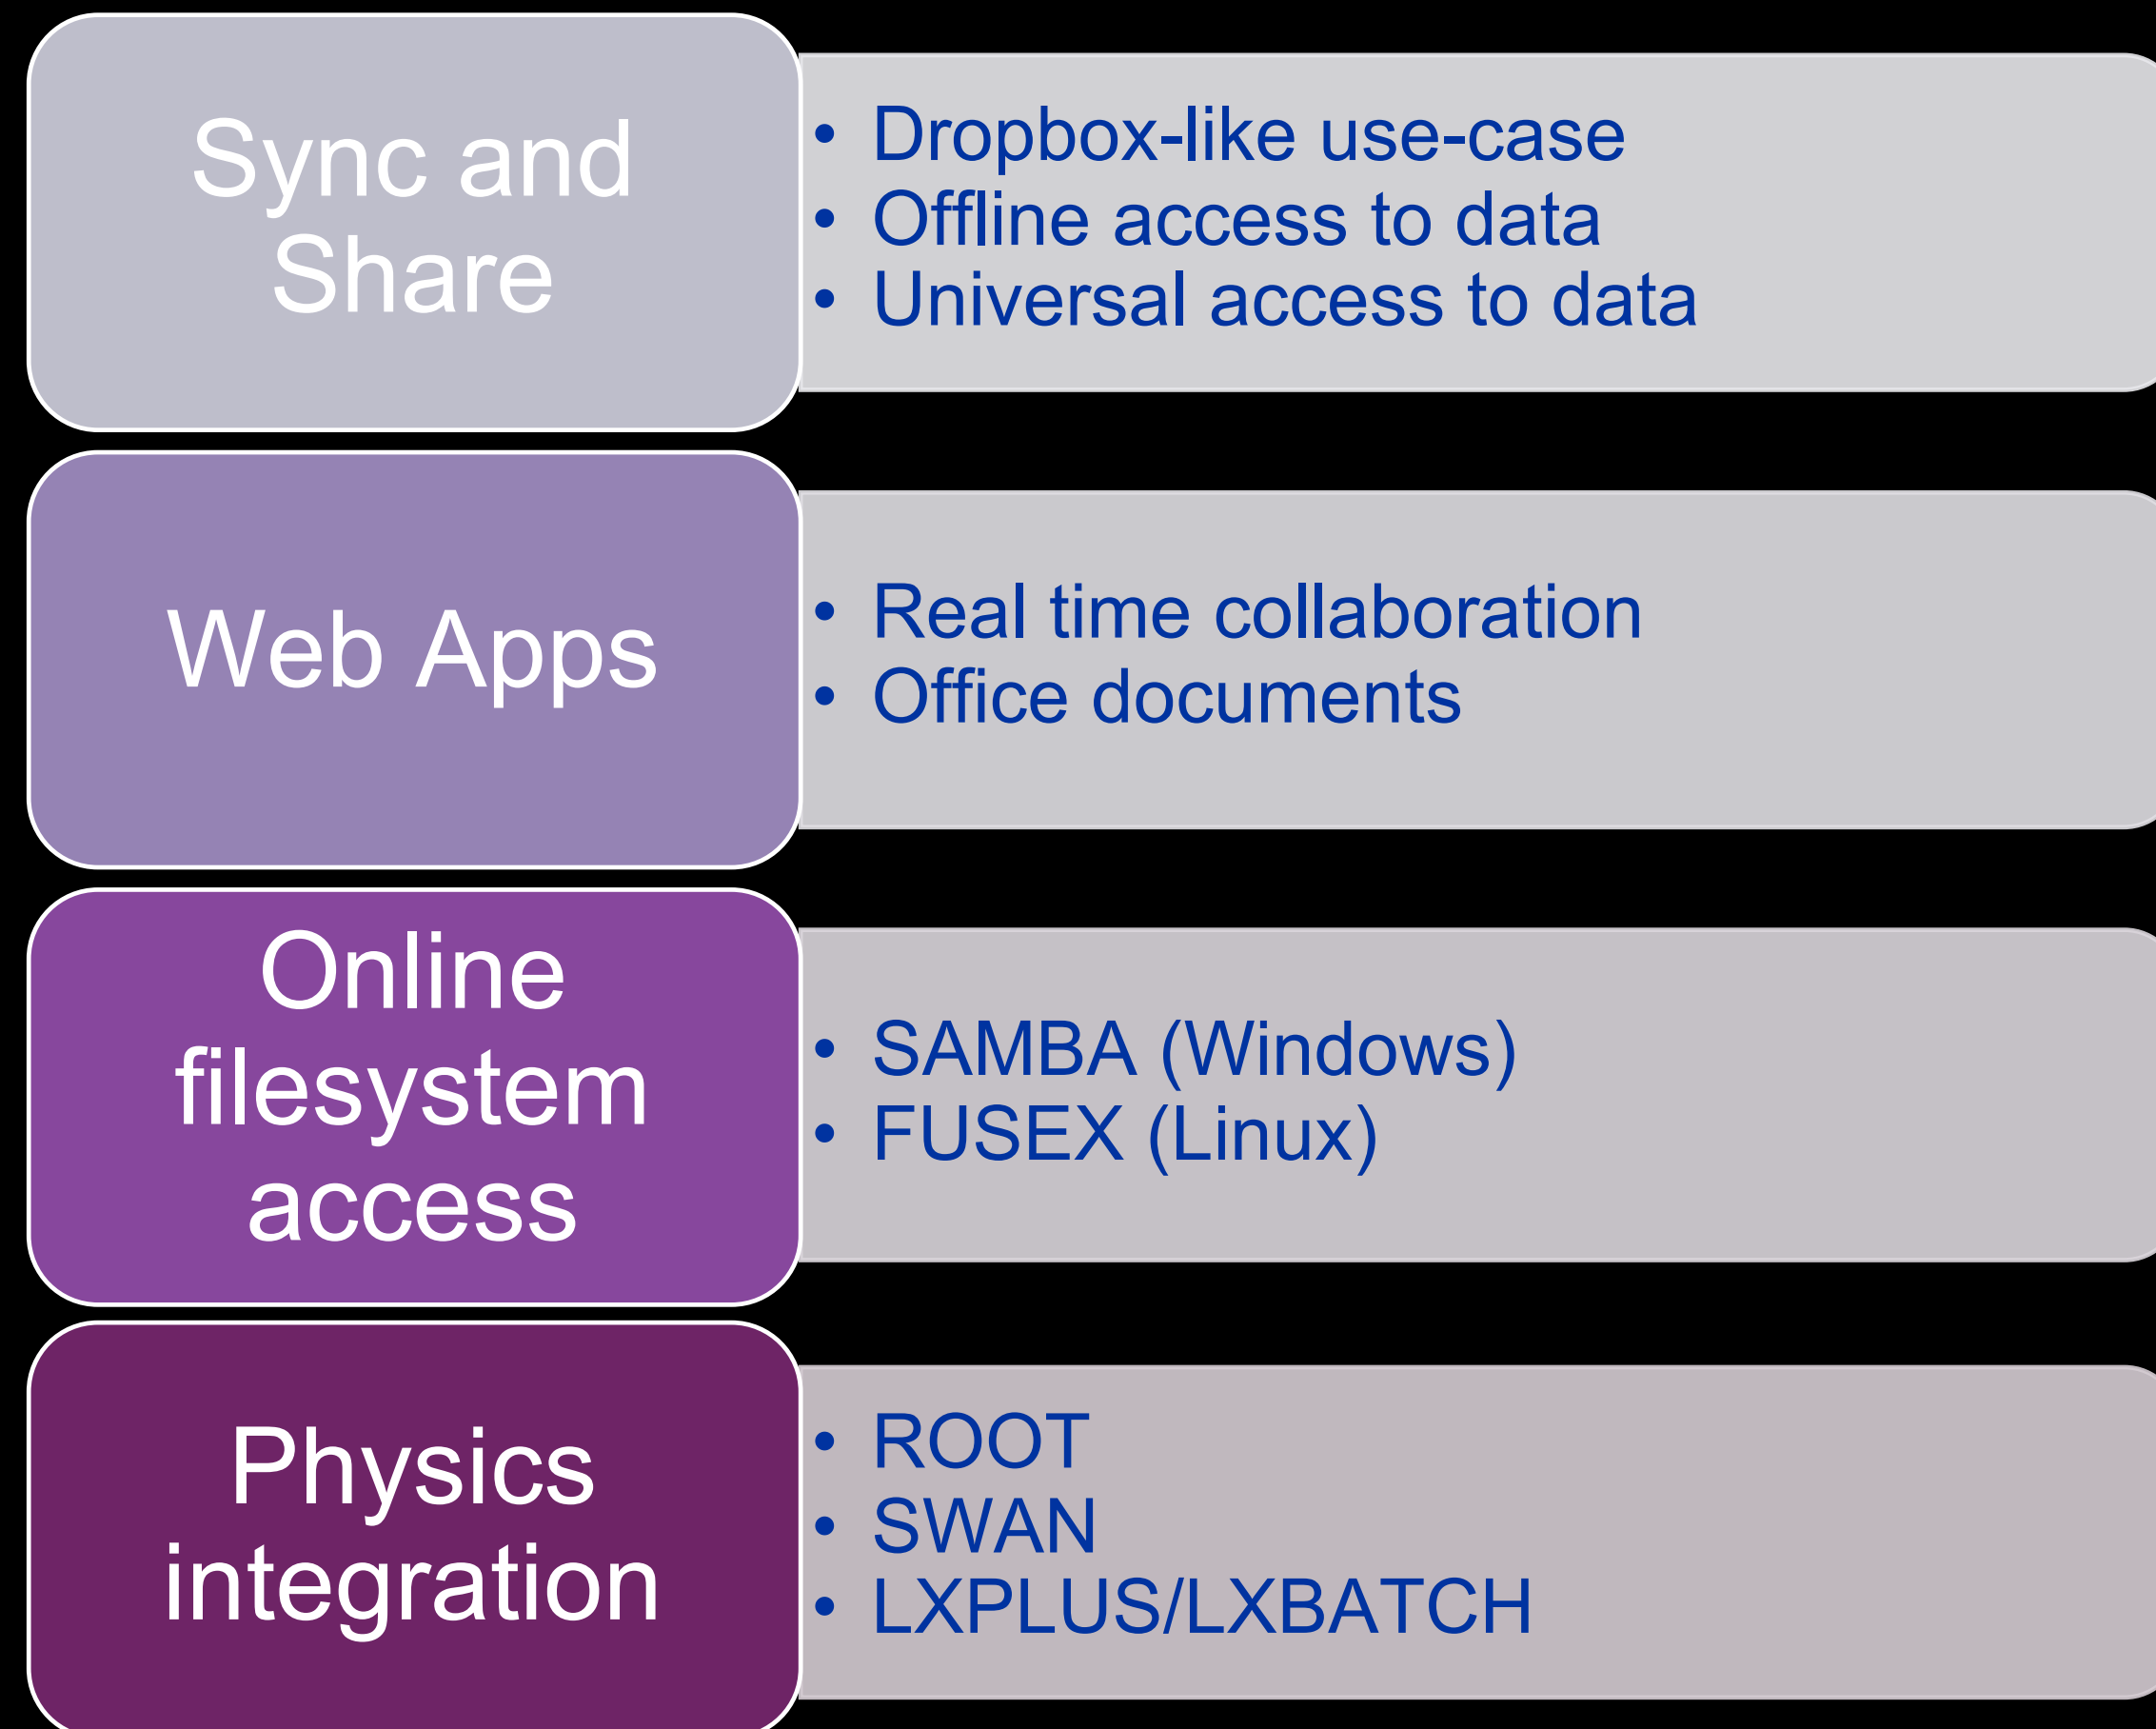

- Project Lead and Service Manager
- Team of 12 people
- 5 functional areas

- WP3 leader (Technology and Foundation)
- Team of 10 people (from different EU institutions)
- WP3 = 204 Person-Month

CERNBox in a nutshell

The team

- 5 STAFF
- 5 FELLOW
- 1 PJAS
- 1 TTE

Functional areas

"Un pour tous et tous pour un"

ROTA
(~All members)

Web
(~2)

Desktop/Mobile
Apps
(~2)

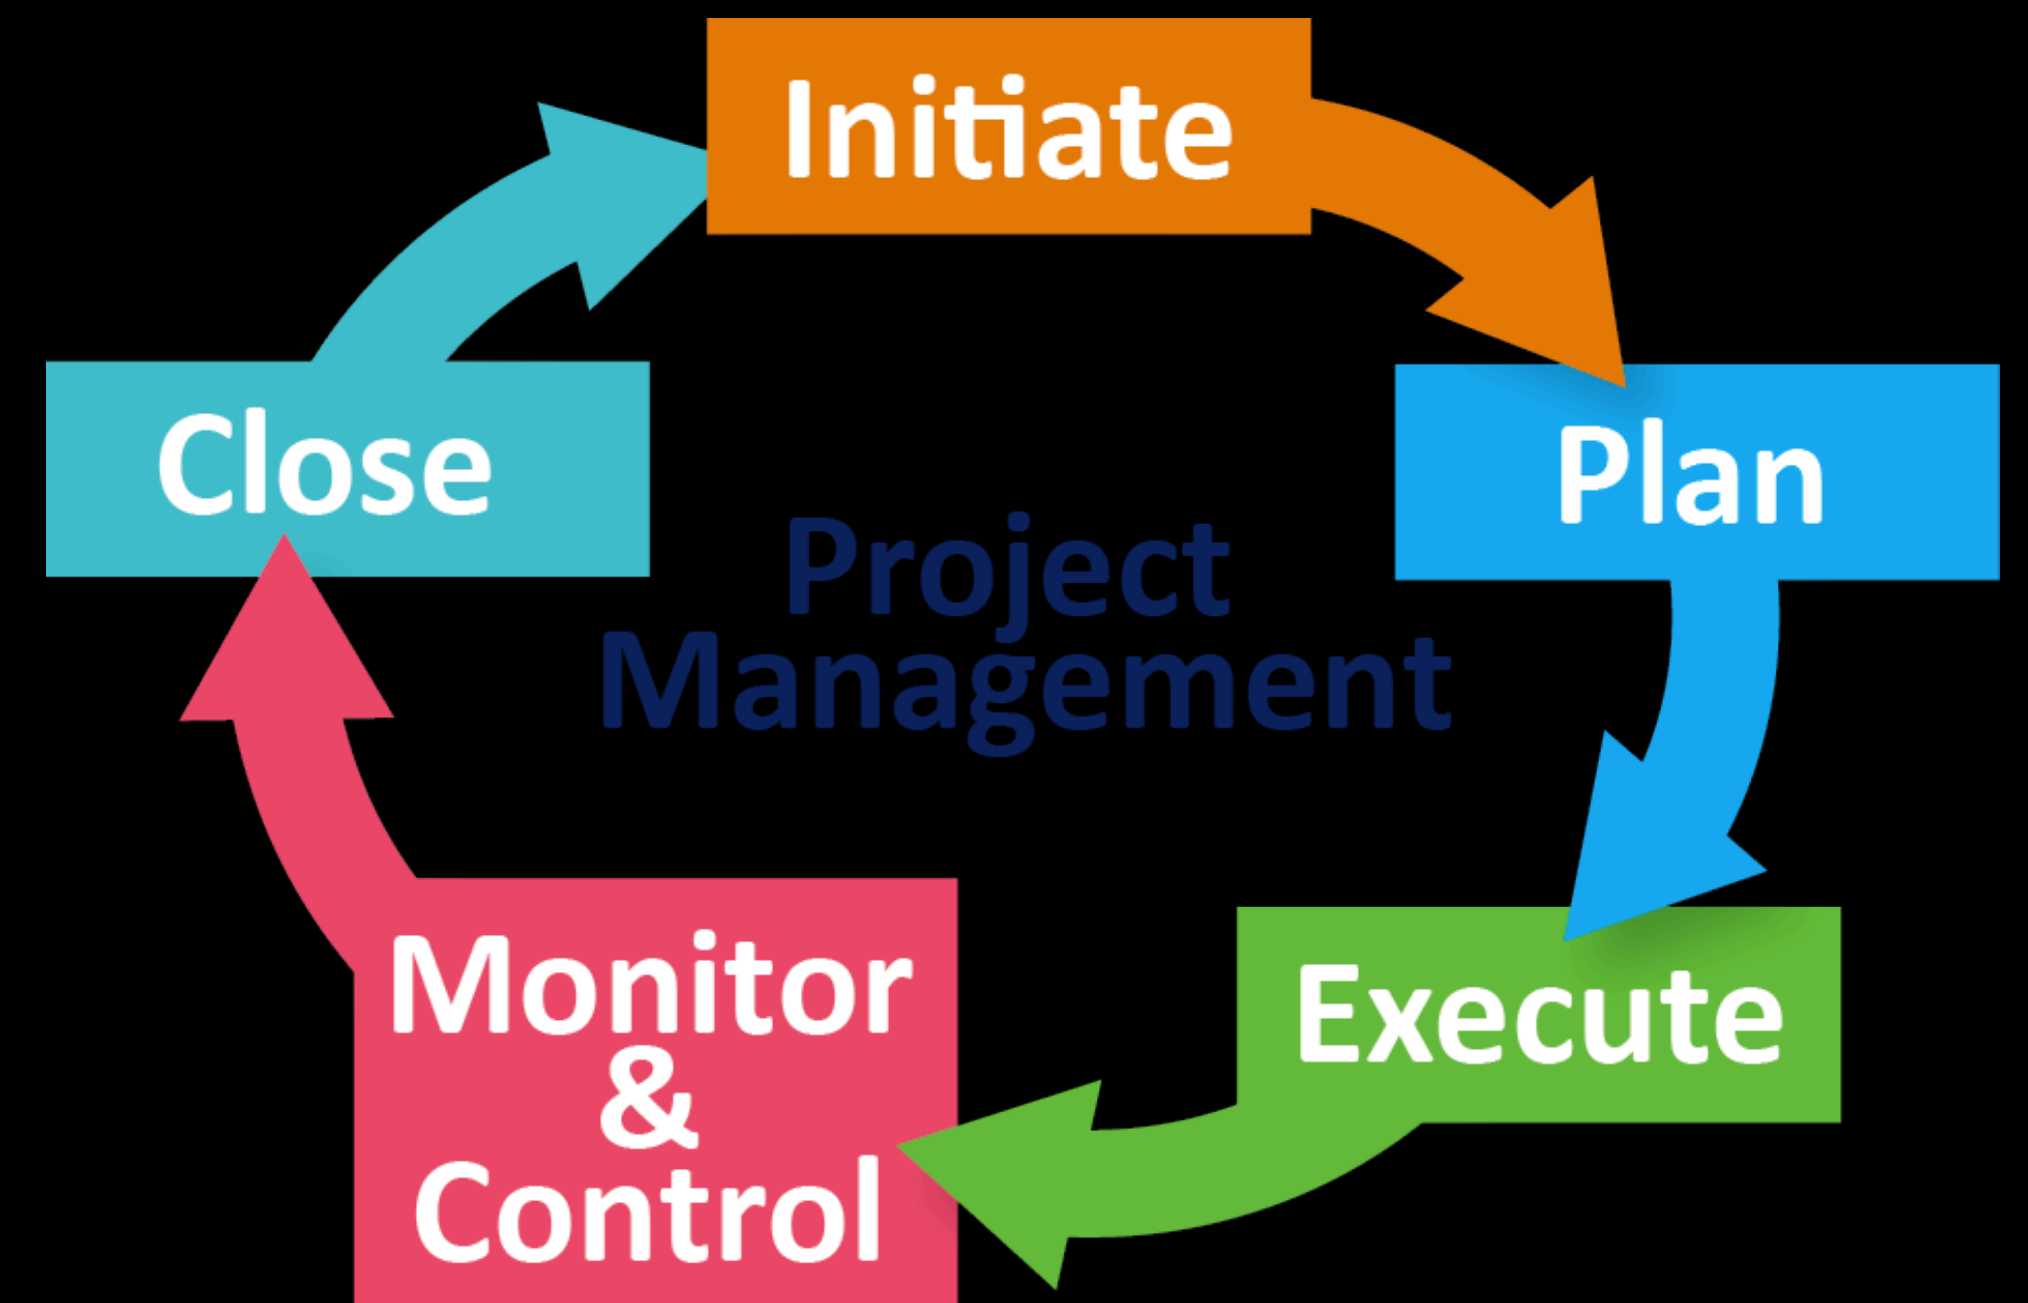

App integrations
(~2)

SAMBA
(~2)

Storage EOS
(~4)

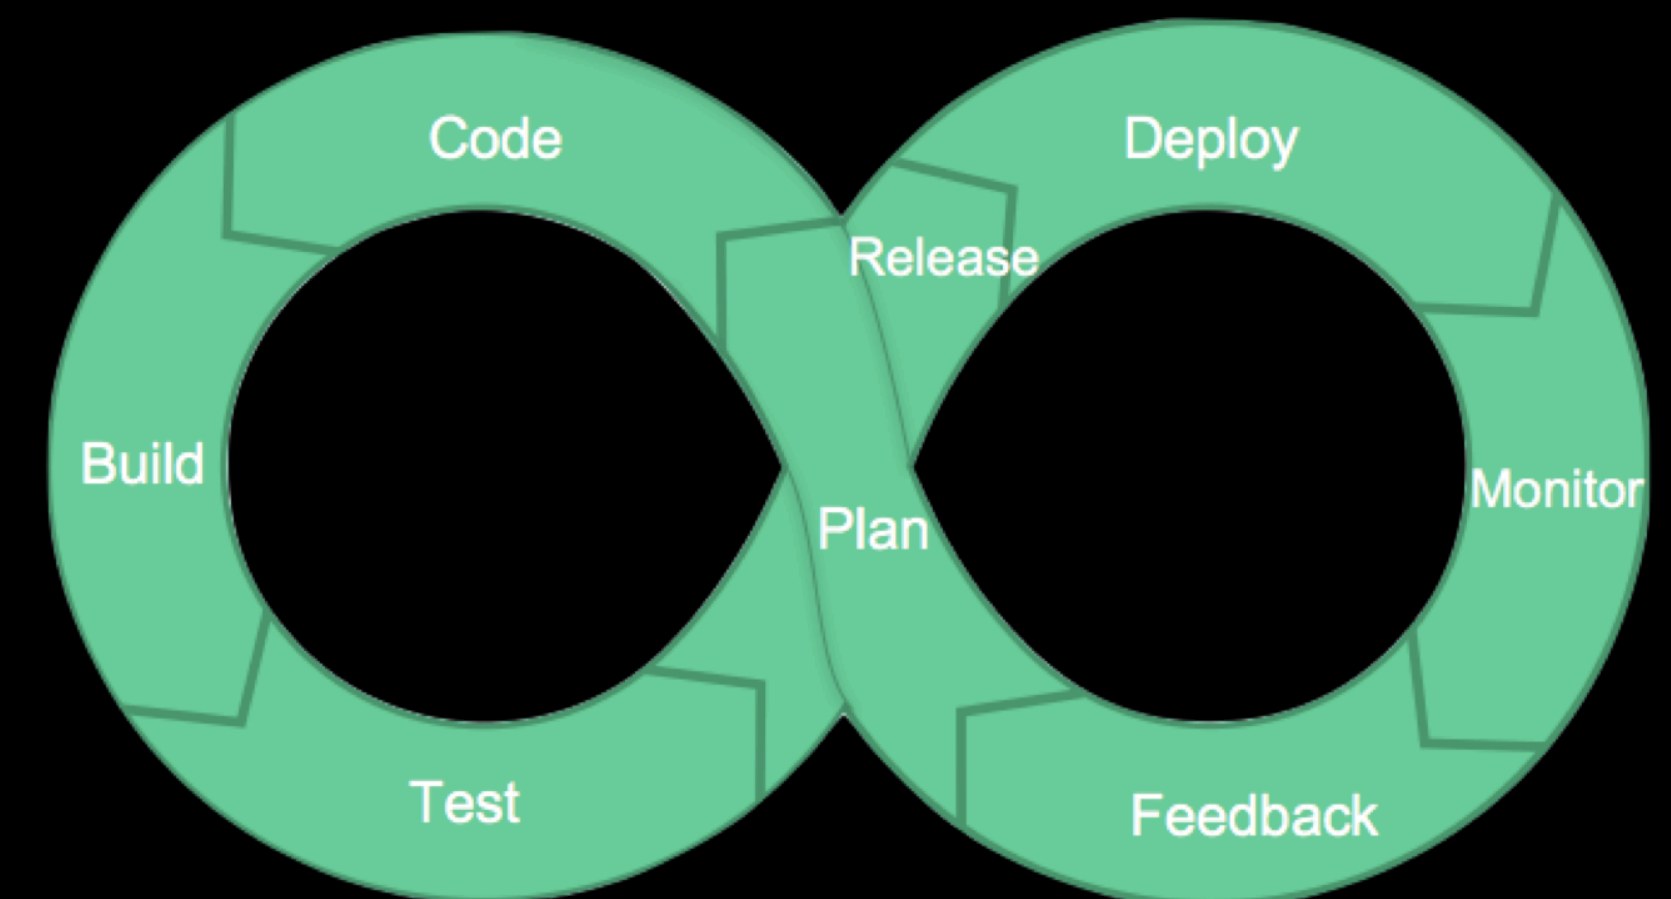

Project Management

- Is the process of leading the work of a team to achieve goals in time
- As project manager
 - Create project plans (why, how, what)
 - Stakeholder management (for who)
 - Communication (to)
 - Managing teams (together with)
 - Controlling schedule (when)
 - Assessment of risks (what if)
- Many ways to develop this process, one is with Agile methods

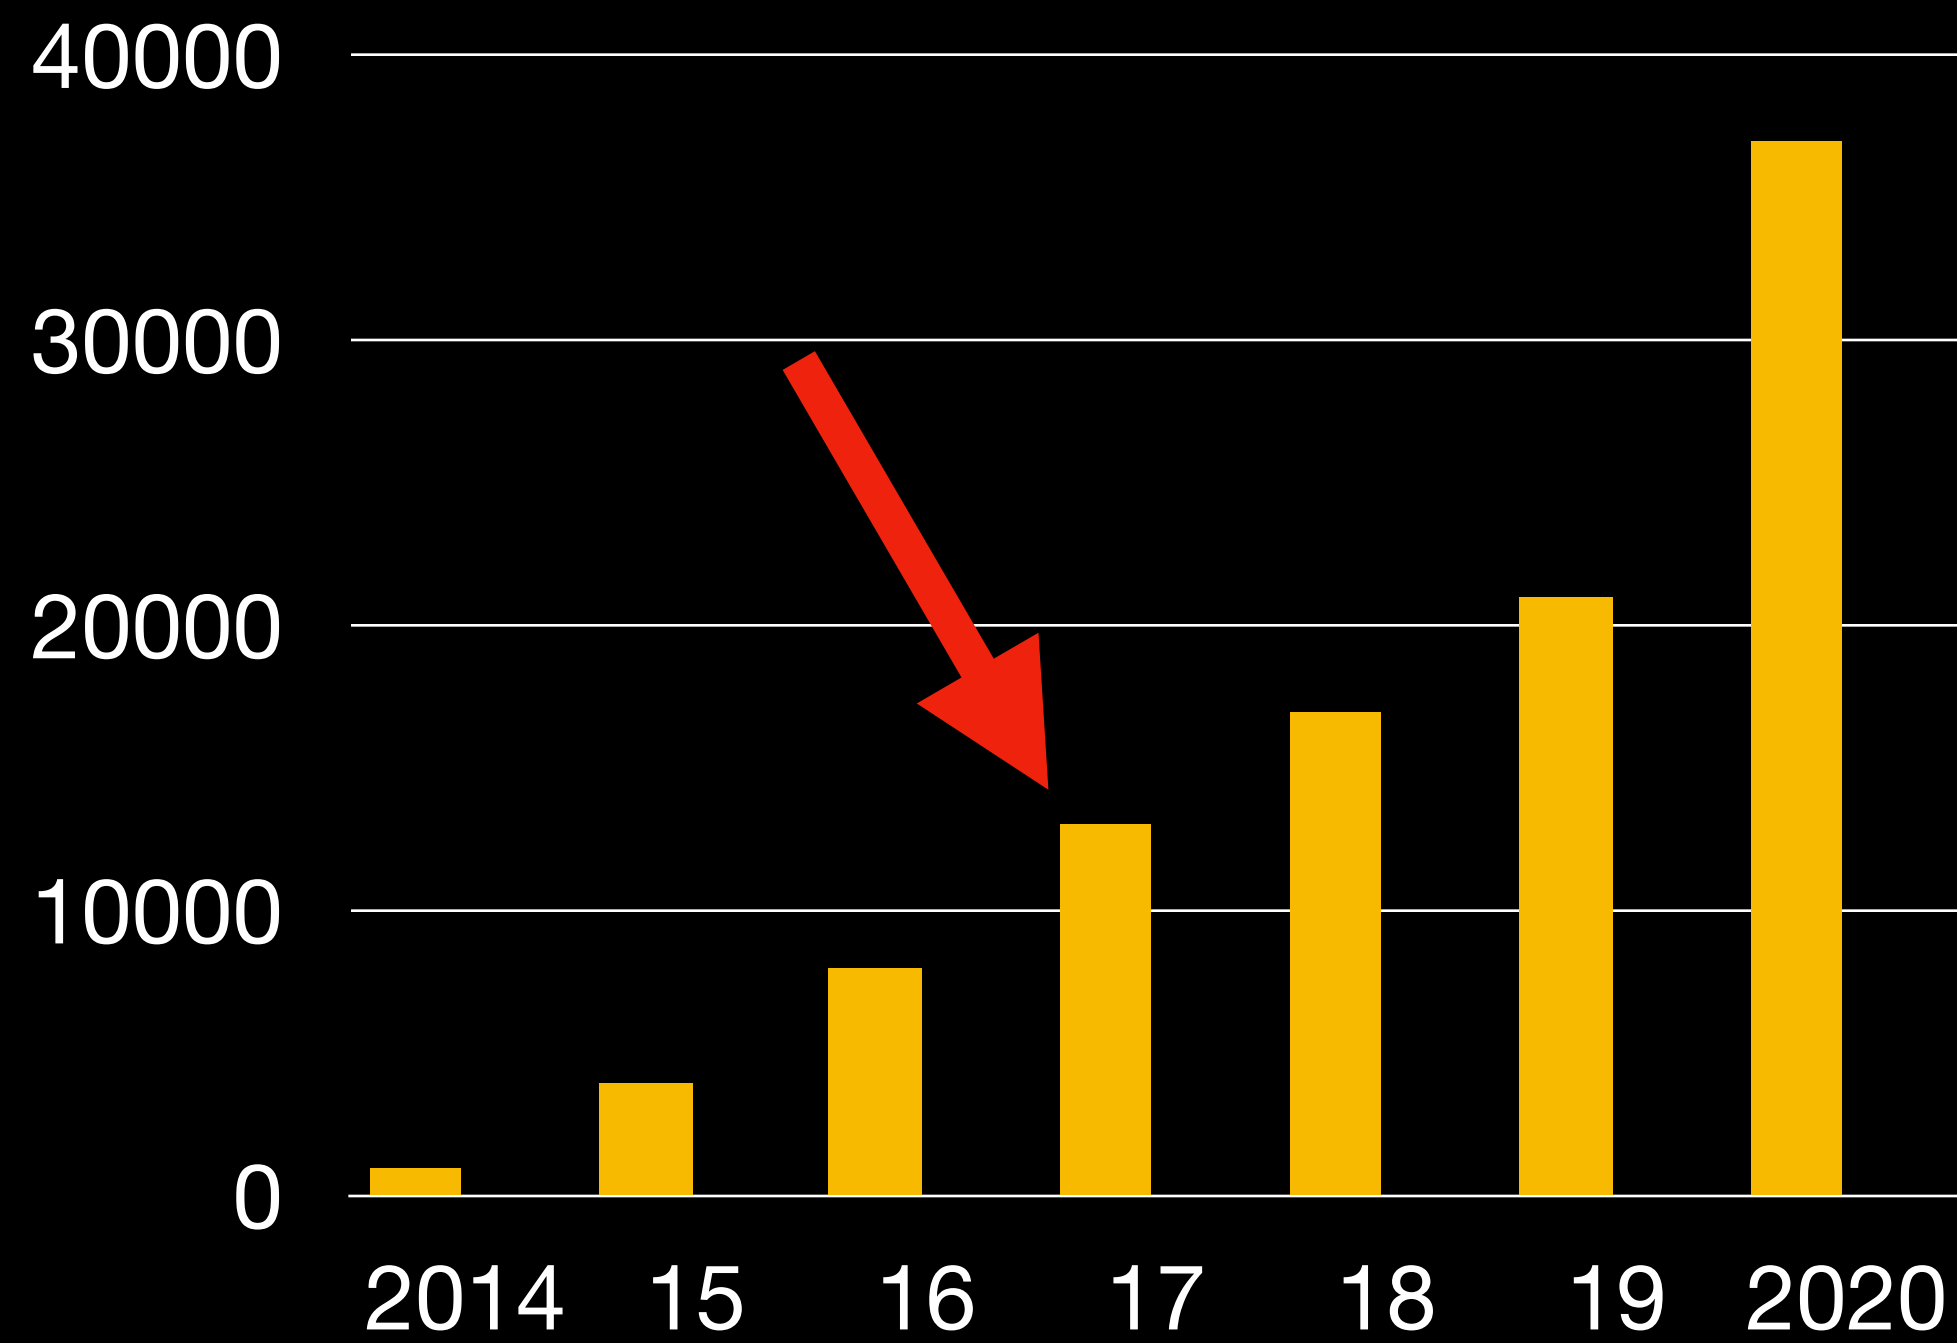

Agile Software Development

- Self-organizing (per functional area) and cross-functional teams (pizza teams)
- Iterative, incremental and evolutionary (ship faster)
- Short feedback loops (daily, weekly, biweekly)
- Virtues (theory vs practice)
 - Individuals and interactions over processes and tools
 - Working Software over comprehensive documentation
 - Customer collaboration over contract negotiation
 - Responding to change rather than following a plan

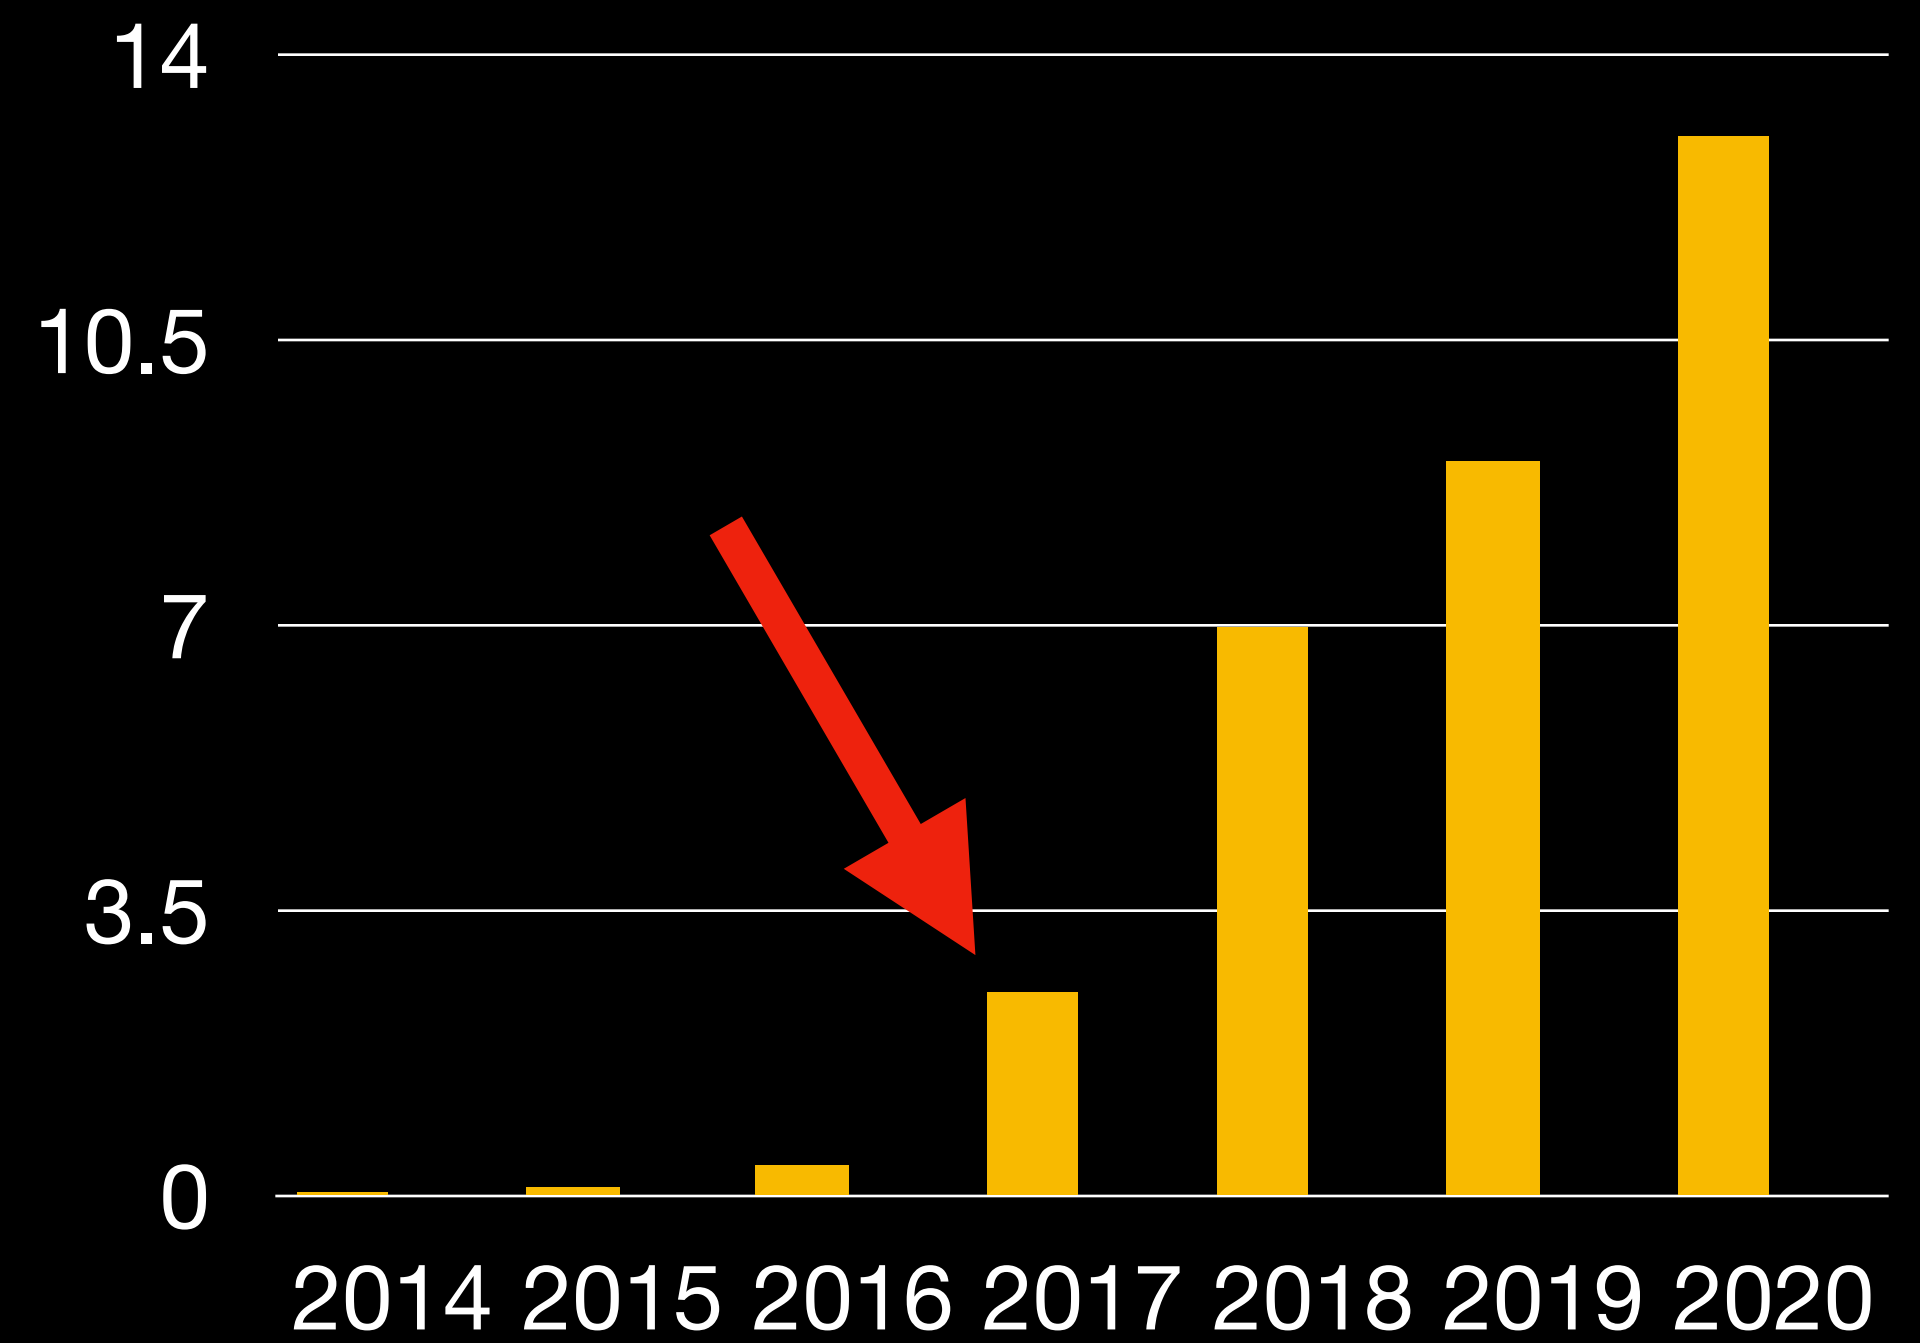

Why Agile?

Number of user accounts

Data stored (Petabytes)

How do we do Agile?
We don't polarize, we take features from both models to fit the dynamics of the team

	Scrum	Kanban
Cadence	 Regular fixed length sprints (ie, 2 weeks)	Continuous flow
Release methodology	At the end of each sprint	 Continuous delivery
Roles	Product owner, scrum master, development team	 No required roles
Key metrics	 Velocity	Lead time, cycle time, WIP
Change philosophy	Teams should not make changes during the sprint.	 Change can happen at any time

What do we do?

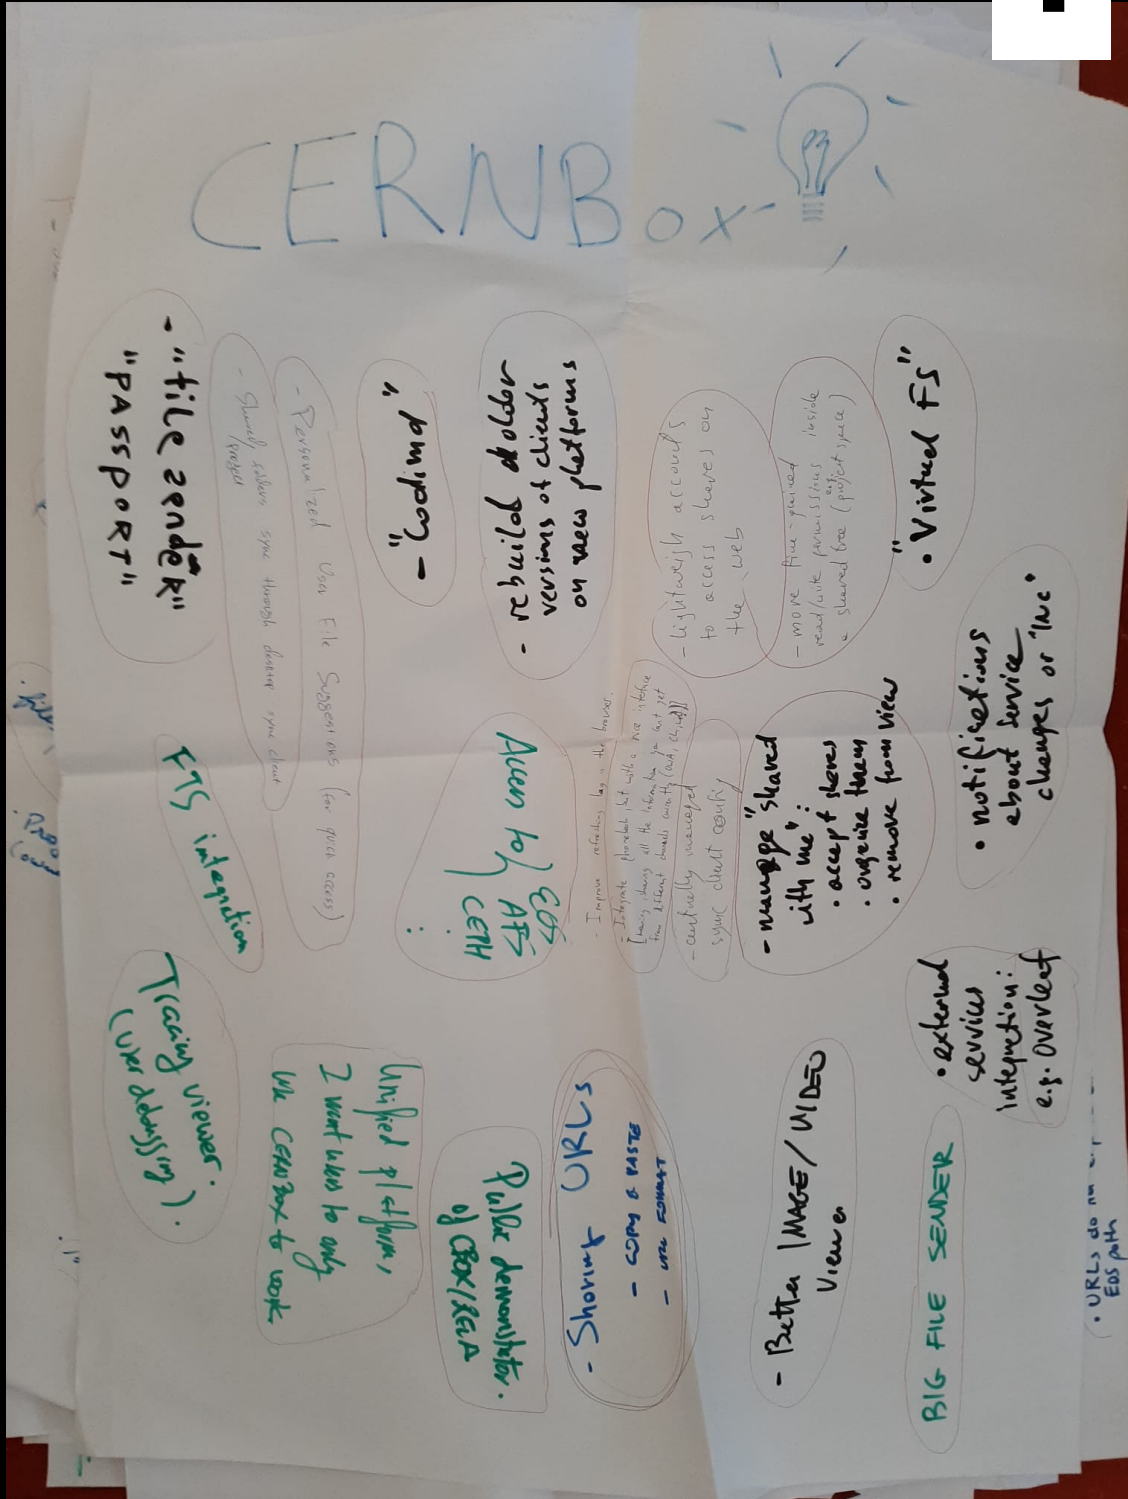

Backlog creation

4

Issues in Epic

CERNBOX-1611	Dismantle Redis cluster running in cbox-lbproxy boxes	OPEN	Unassigned
CERNBOX-1613	Review locmap config for fuse	CLOSED	Unassigned
CERNBOX-1625	Decommission "eosmigr" node used in the EOSUSER->EOSHOME migration	OPEN	Roberto Valverde Cameselle
CERNBOX-1606	Review homedirectory script	CLOSED	Hugo Gonzalez Labrador
CERNBOX-1610	Review web logic	CLOSED	Hugo Gonzalez Labrador
CERNBOX-1608	Review NGINX	CLOSED	Hugo Gonzalez Labrador
CERNBOX-1607	Review http redirector	CLOSED	Hugo Gonzalez Labrador
CERNBOX-1609	Review existing traffic in EOSUSER	OPEN	Roberto Valverde Cameselle

1

2

	TO BE SCHEDULED	Q1	Q2	Q3

EPICS

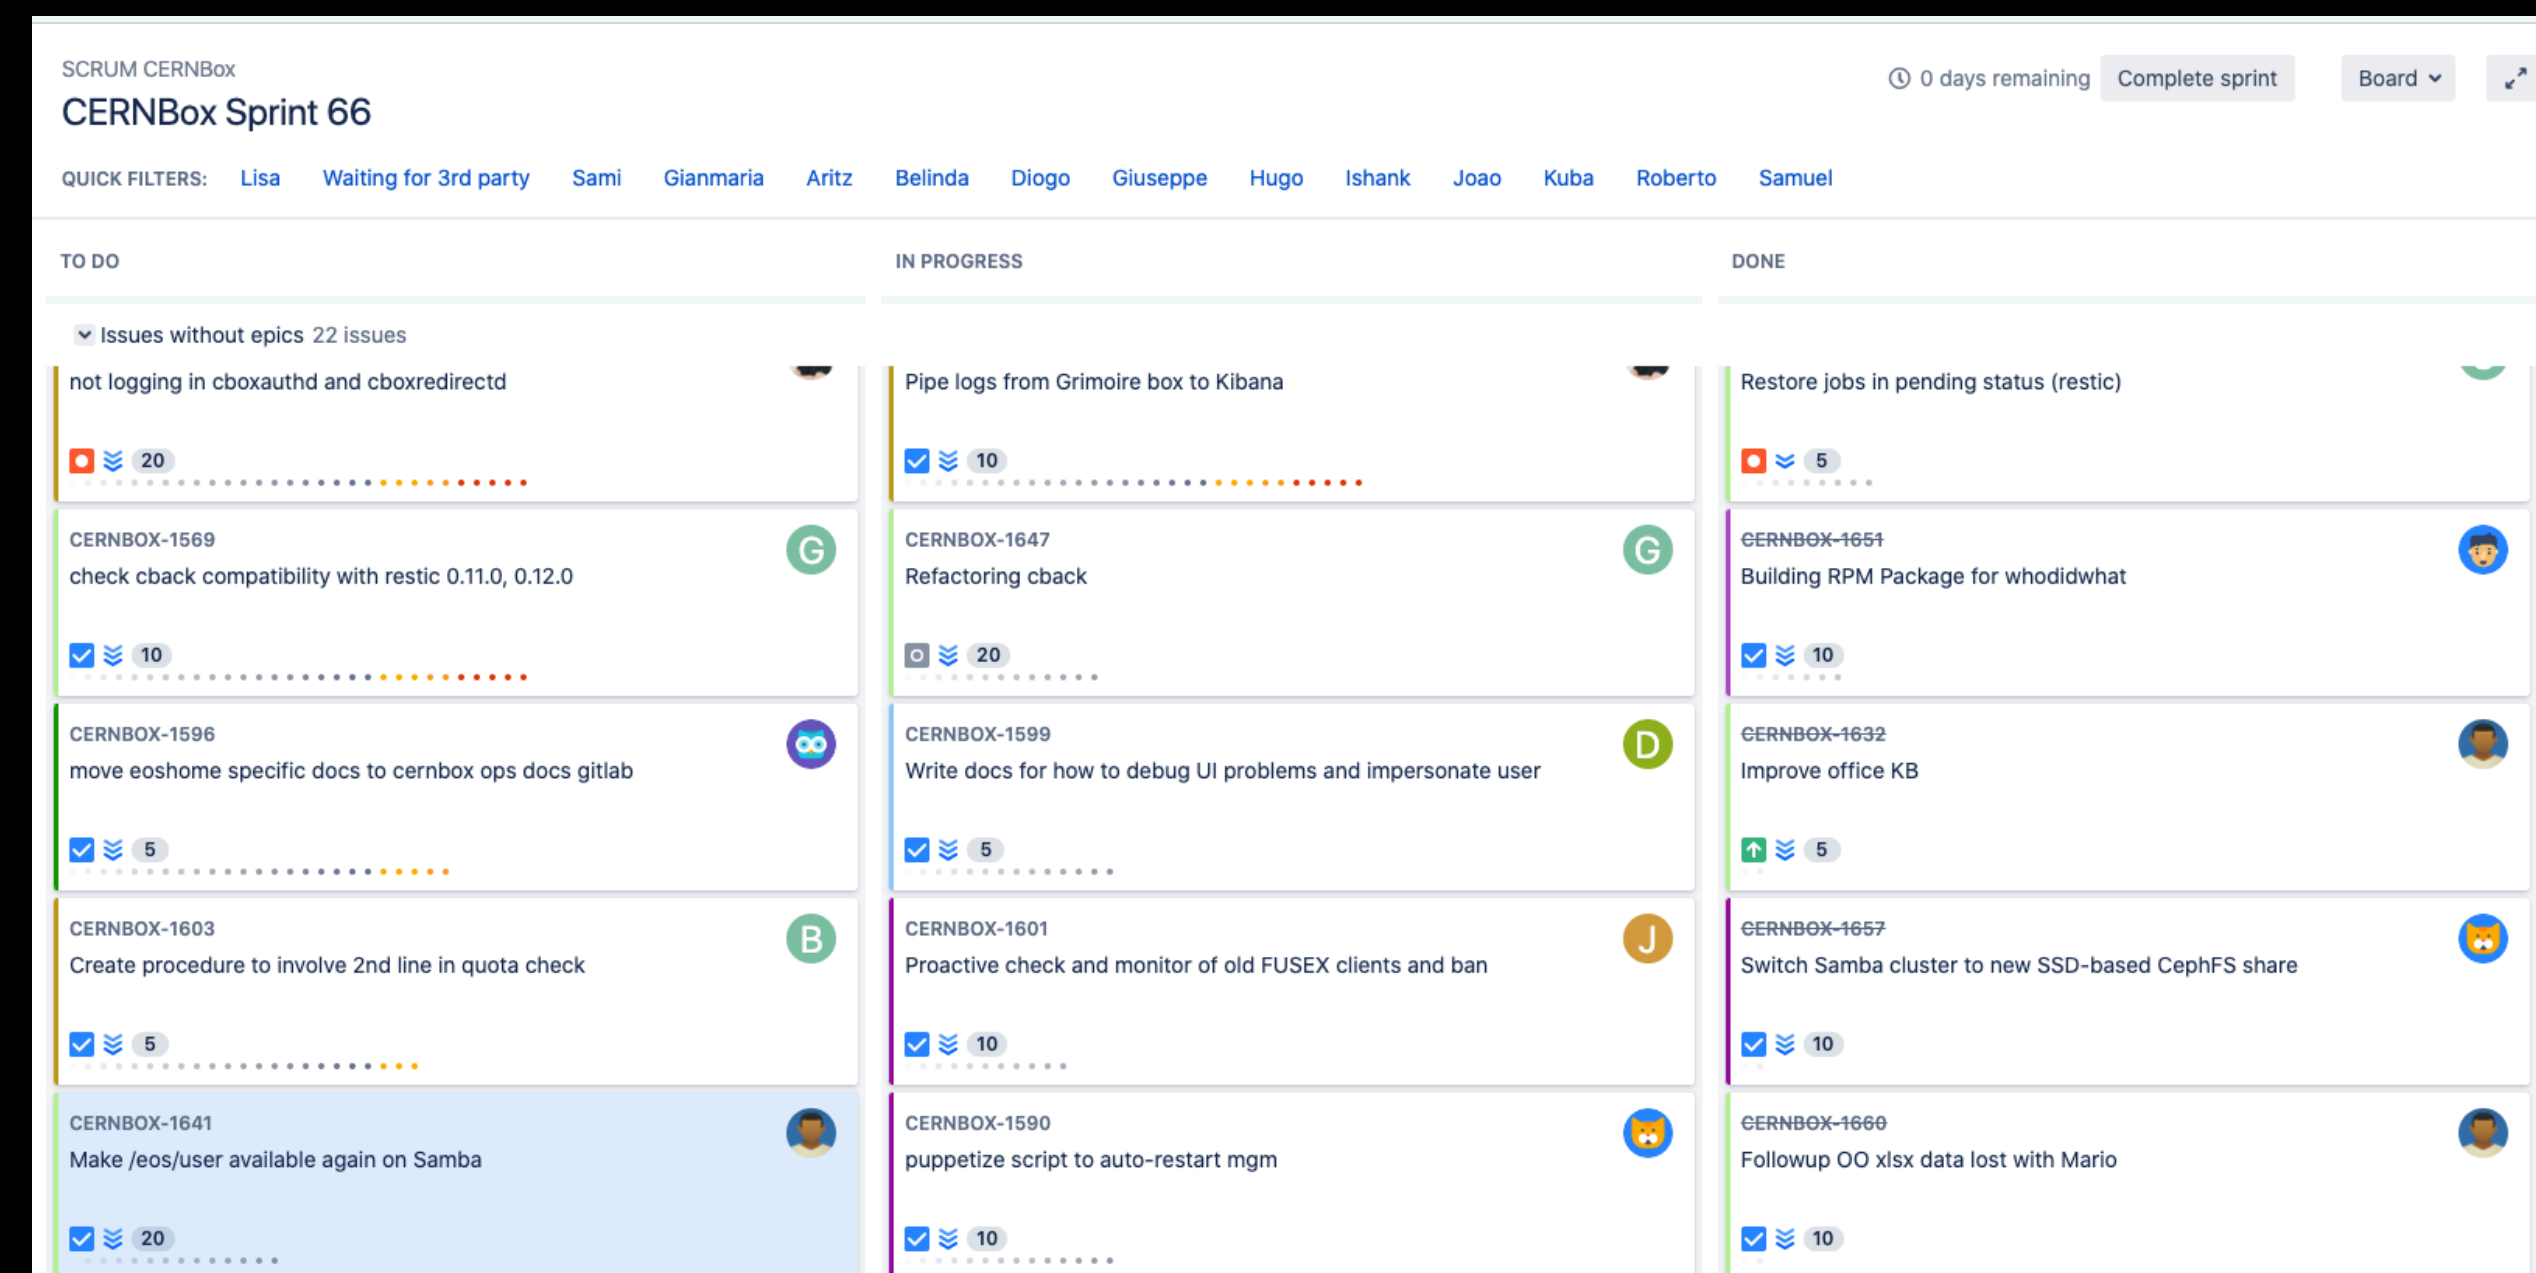

- All issues
- > ACL Next Generation
- > Better Project Spaces
- > APPMIGR
- > SHAREPOINT
- > EOSUSER-Decomission
- > EOSBACKUP-Decomission
- > FCC
- > DFS-migr
- > EOSHOME-SSD
- > OCIS Basic
- Issues without epics

What do we do?

Sprint Planning

- Time boxed goals and deliverables: 2 weeks sprints
- Light resource estimation based on story points: 5 (~2 days), 10 (~1 weeks), 20 (~2 weeks)
- Prioritisation based on:
 - Epic deadlines
 - Firefighting
- Removing from Sprint is forbidden, adding is possible
- Kanban board from Sprint overview

KANBAN

What do we do?

Sprint Review

- No formal retrospectives
- Simply review: Done? ok
 - Not done? Why, blockers, help?

Status Report * Issue added to sprint after start time

Completed Issues [View in Issue navigator](#)

Key	Summary	Issue Type	Priority	Status	Story Points (25 → 95)
CERNBOX-1586	Restore jobs in pending status (restic)	 Bug	 Low	CLOSED	- → 5
CERNBOX-1606	Review homedirectory script	 Task	 Minor	CLOSED	- → 5
CERNBOX-1607 *	Review http redirector	 Task	 Minor	CLOSED	- → 5
CERNBOX-1608 *	Review NGINX	 Task	 Minor	CLOSED	- → 10
CERNBOX-1610 *	Review web logic	 Task	 Minor	CLOSED	- → 5

What do we do?

Release Cycle: QCP (Quick Change to Production)

Quality Assurance Phase
Canary Phase
Production Phase

Canary Testing

Enable bleeding edge UI and applications? Yes No

What do we do?

Feedback loops

- **Daily stand-ups** (what I plan to do, where I need help) - 5 min
- **Weekly meetings** (Mondays 16:30) - 1H
 - What is going on (raise awareness)
 - Executive summaries from functional areas
 - ROTA debrief and add improvement points
- **Bi-weekly sprint meetings** (Fridays 15:00) - 1.5H
 - Peace of mind

What do we do?

Delegation and dependency management

Each component has a responsible

Component	Status	Issues	Lead	Description	Default assignee	Actions
backup	ACTIVE	36 Issues	 Roberto Valverde Cameselle		Component lead	...
docs	ACTIVE	29 Issues	 Belinda Chan Kwok Cheong	Documentation for the CERNBox Service	Component lead	...
eos	ACTIVE	64 Issues	 Roberto Valverde Cameselle	EOS for the CERNBox Service	Component lead	...
integrations	ACTIVE	7 Issues	 Giuseppe Lo Presti	Integrated applications	Component lead	...
mobile	ACTIVE	4 Issues	 Samuel Alfageme Sainz	Mobile apps for CERNBox Service	Component lead	...
ocis	ACTIVE	5 Issues	 Ishank Arora		Component lead	...
ops	ACTIVE	52 Issues	 Hugo Gonzalez Labrador	Operations for the CERNBox Service	Component lead	...

Some tips

Exploit your bottlenecks

- A local optimization unrelated to the bottleneck causes global system degradation
- Where to find the bottleneck?
 - 5 Ms (Man, Machine, Material, Method, Measurement)

Theory of Constraints

- Pipeline analogy

- Which piece of the pipe is restricting the flow?
- Would making parts A or D bigger help?

Meta-Review: Review how you review

Be open minded

- 3 simple questions:
 - What should we **CONTINUE** doing?
 - What we should **STOP** doing?
 - What we should **START**?

What we should start doing?

- Diogo: Maybe a monthly, or quarterly, wrap up where we all - as a team - see what was done/achieved and what should be the priorities for the next one (this is already kind of done by the Service Manager, but by involving everyone it might create a shared ownership mindset?) (+1)

What we should stop doing?

- Samuel: Review which automatic emails can be disabled / reduce their frequency (+1 on this!)

What we should continue doing?

- Diogo: Daily standups
- Aritz: Annual brain storming session as we did last year, but having a more concrete outcome, having fewer and more specific goals for the service, setting some sort of timeline for them, with different priorities.

Optimize personalities

Business Chemistry (Deloitte), Colour Personality (DISC)...

Conclusion and outlook

Agile is here to stay

- Agile helped to drive progress, manage complexity in a service that was (is) skyrocketing in usage
- Agile helped to reduce risks: avoid waterfall pitfalls
- Agile helped to raise team awareness: Just look at the sprint.
- Agile is a means to an end, not the end itself
- The most important aspect of your service is your team
- Next things to try:
 - Set Quarterly Reviews
 - Sprint Reviews driven by Rota person
 - Give a try to JIRA Gantt diagram for Epic visualization
