

# How I (try to) stay private throughout the day?

Miguel Coelho dos Santos  
Deputy Head of Data Privacy  
CERN

# Disclaimer

---

- This (short) presentation is an awareness presentation with some personal examples
- It does NOT constitute recommendations or opinions from ANY organisation involved in this event

Privacy? Does anyone care?  
Who wants my data?

***Data is the world's most valuable resource,  
according to The Economist***

# Jaron Lanier

Some of the wealthiest and most successful companies of all time

With relatively few employees, they just have this giant computer that rakes in money

Now what are they being paid for?

Ads? Too simplistic

It's the gradual, slight, imperceptible change in your own behavior and perception that is the product.

Changing what you do, how you think, who you are.

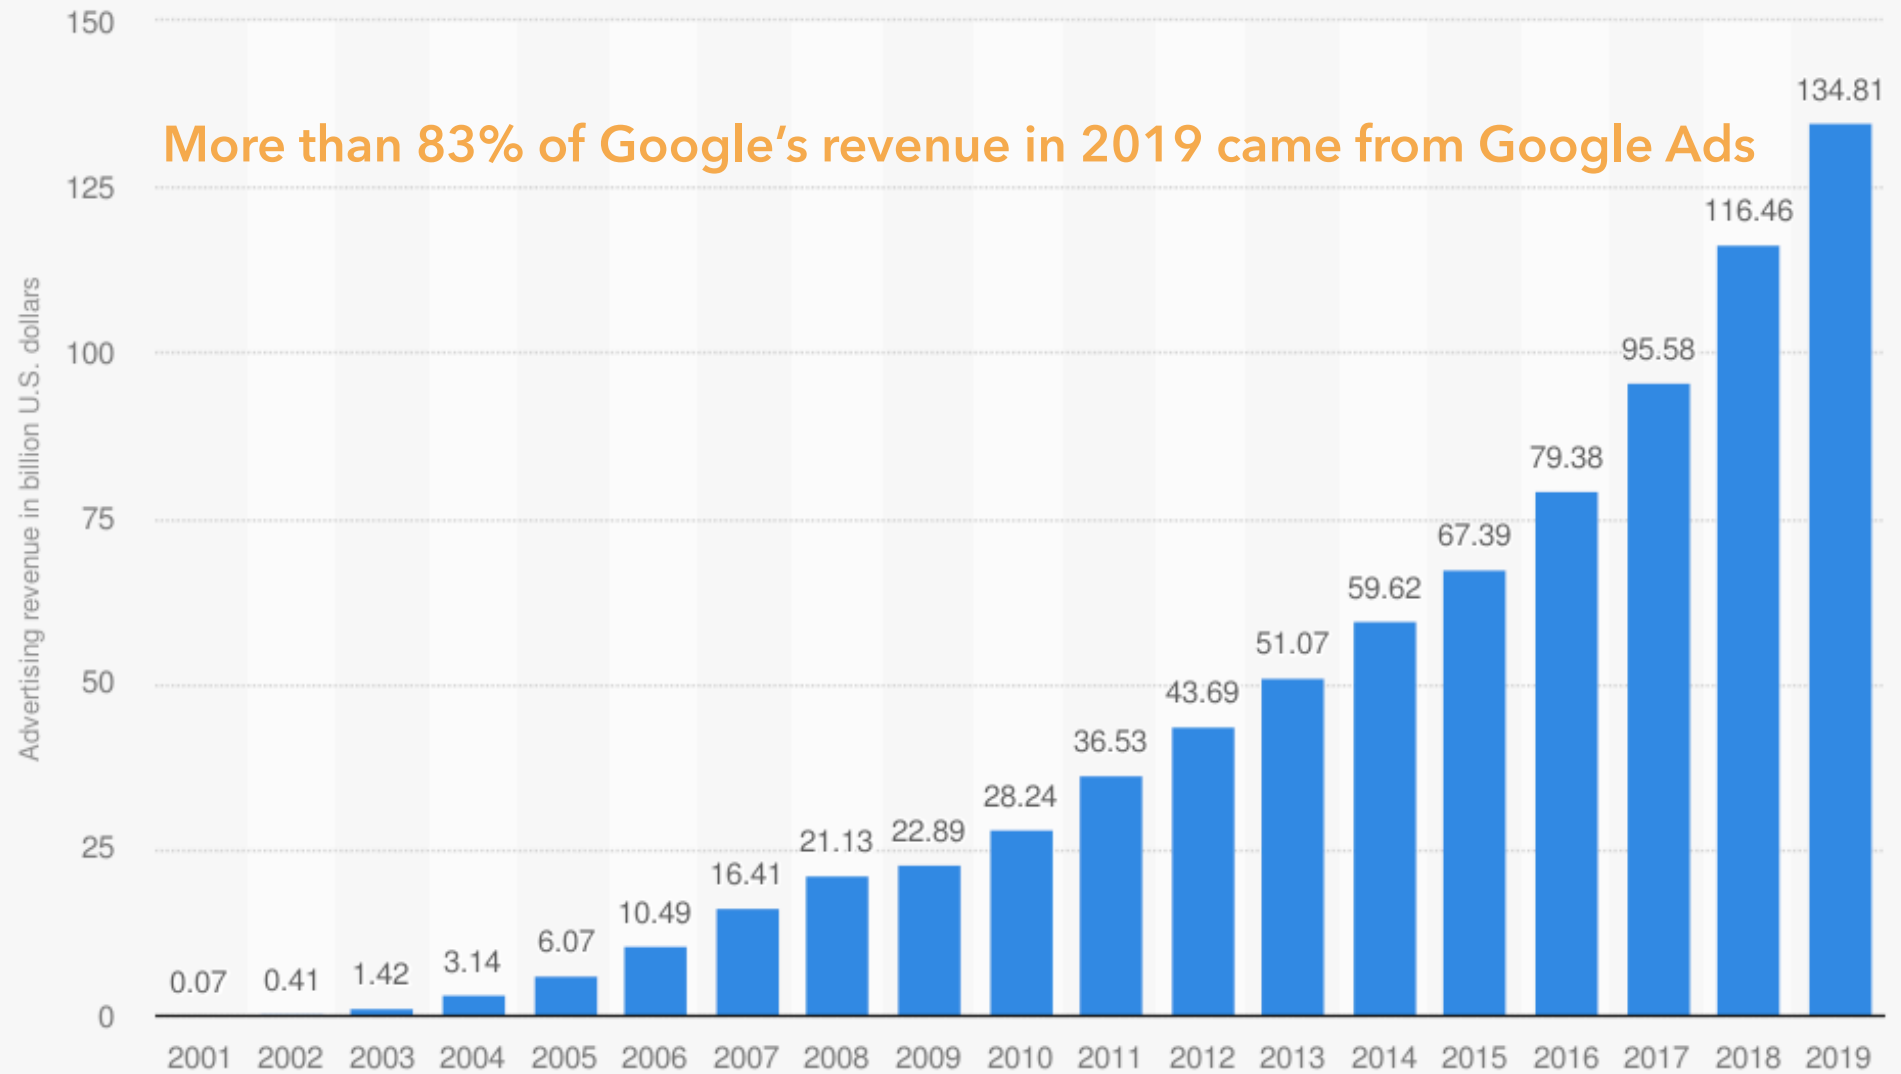

## Facebook's annual revenue from 2009 to 2019 (in million U.S. dollars)

## Advertising revenue of Google from 2001 to 2019 (in billion U.S. dollars)

### Additional Information:

Worldwide; Google; 2001 to 2019

# Jaron Lanier

Some of the wealthiest and most successful companies of all time

With relatively few employees, they just own this giant computer that rakes in money

Now what are they doing with all that money?

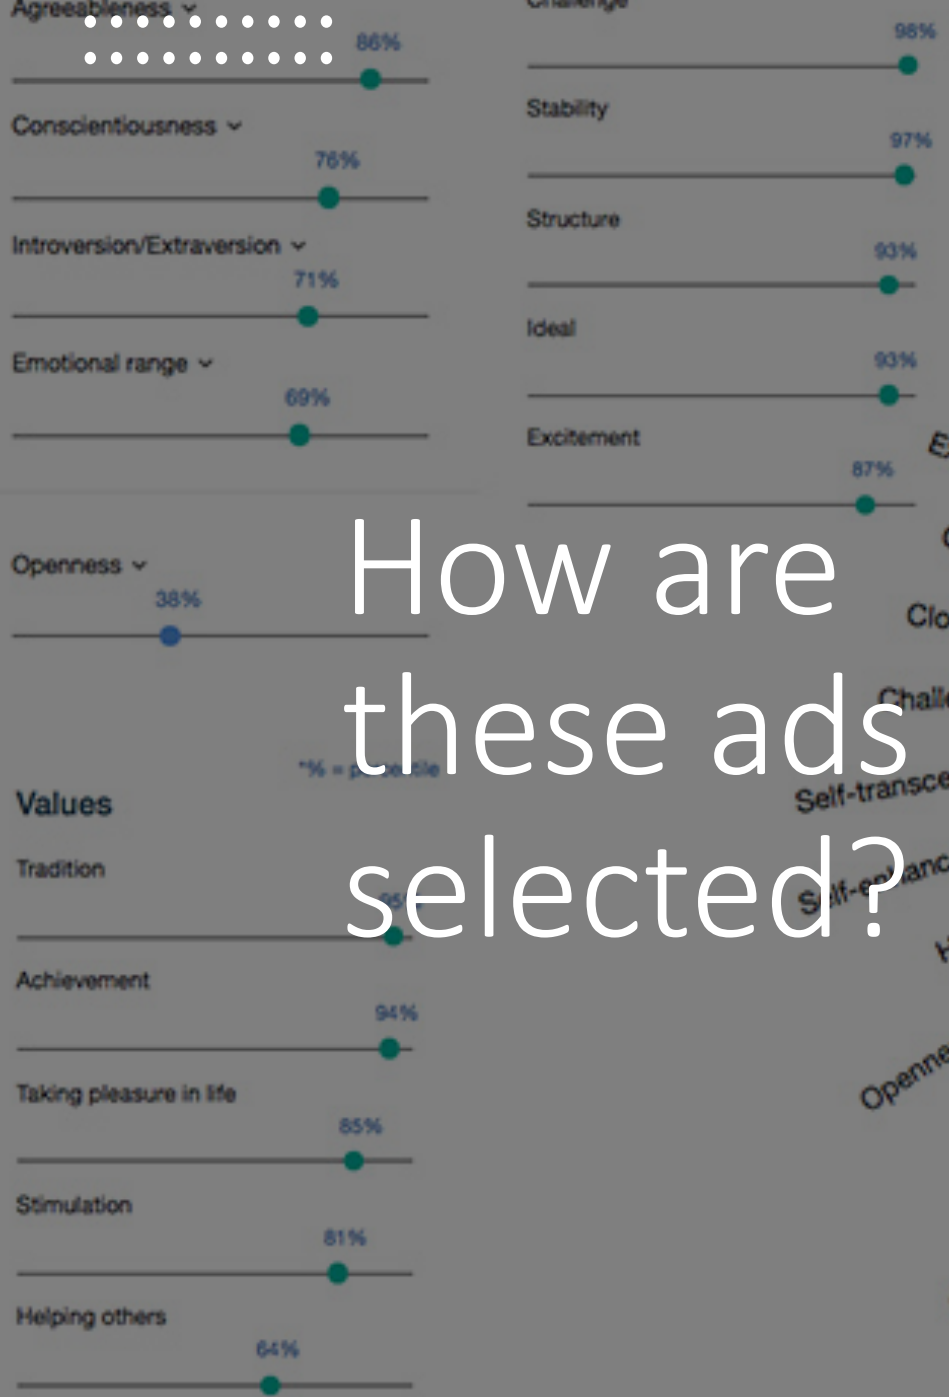

Ads? Too simplistic

It's the gradual, slight, imperceptible change in your own behavior and perception that is the product.

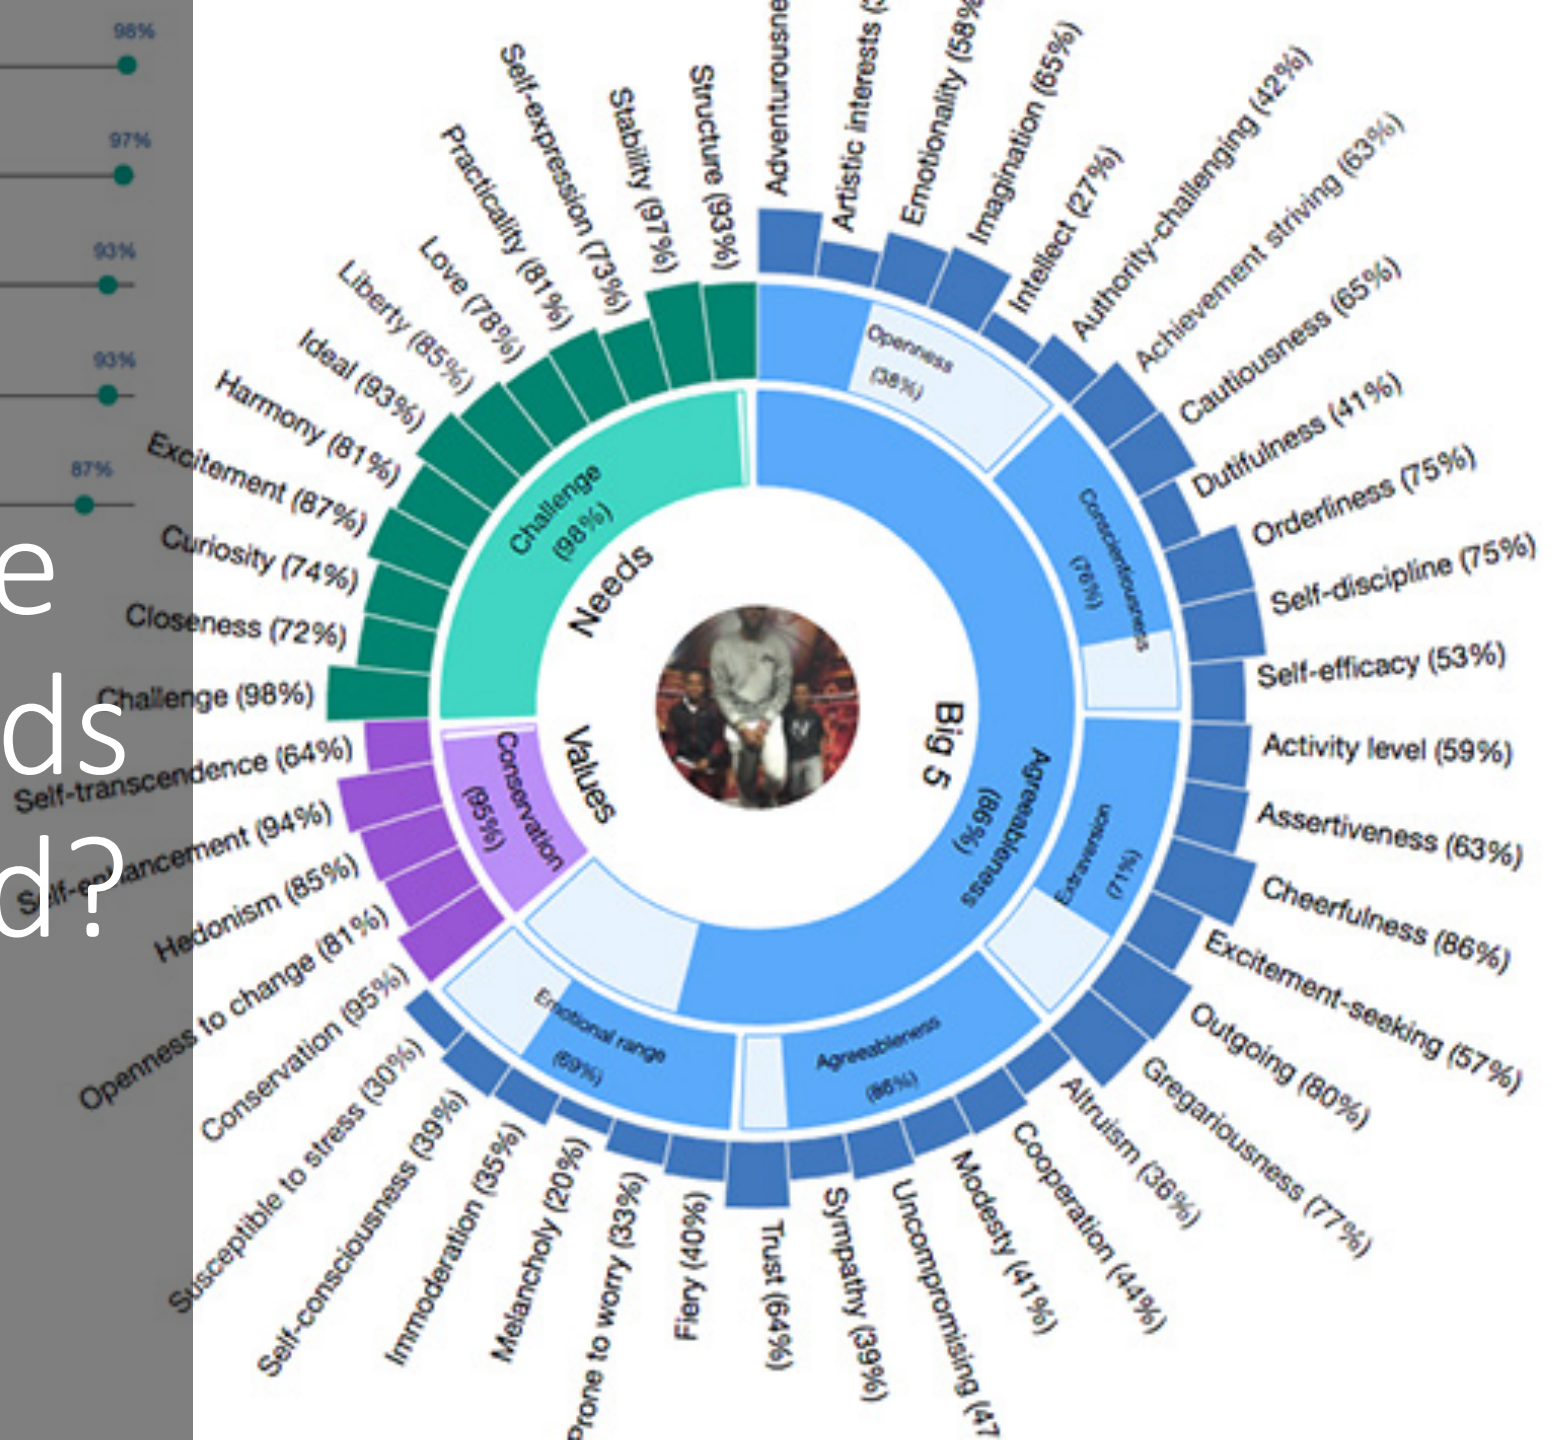

Changing what you do, how you think, who you are.

How are these ads selected?

How do they build a model of each of us?

You guessed it:

- Data
- Lots and lots and lots of personal data

How is this  
data collected?

- Your “phone” and the browser is where it started
- Now other companies convert existing products into “smart” versions so they can also generate valuable data sets...
- Laptops, cloud and work apps, smart TVs, smart speakers, smart home surveillance cameras, smart doorbells, smart wifi routers, smart thermostats, smart fridges, smart personal assistants, all recent cars...

# From data to ads to profits

- Get you to spend as much time as you can on your “phone”!
- How to get you on your phone constantly?
- Once that’s achieved, introduce very targeted ads during all those long hours you spend with your phone
- “Changing what you do, how you think, who you are.”

# “Interlude”

- This is not to bash on these companies or their products
- They have great engineers making great products
- They provide a valuable service (otherwise it wouldn't be used)
- The dominating business model (selling users to the clients) has a flip side
- More people now worry on the impact this has
- Change can happen

# How I **tried** to be more private (easy steps)

- Browser
- Search engine
- Instant Messaging
- E-mail
- Navigation
- Whenever I get asked by apps for permission to use my data: say NO

# Browser & The onion router (TOR)

- Modern browsers allow you to be
  - tracked across the web
    - cookies,
    - CDNs,
    - CAPTCHA,
    - social network buttons,
    - social logins,
    - fingerprinting
  - track actions you take inside the browser
  - <https://clickclickclick.click>
  - <https://coveryourtracks.eff.org/>

# Browser & The onion router (TOR)

- Started using only Firefox and sometimes Brave (Chrome based)
- Enabled Plugins to prevent general tracking across the web:
  - uBlock Origin
  - Privacy Badger (EFF)
  - NoScript
  - LocalCDN
- No third-party cookies for me
- Turn on [DNS-over-HTTPS](#) if you distrust your local network; [TOR](#) might also be useful

# E-mail

- Got an encrypted mail provider
  - Protonmail
  - Tutanova
  - ...
- I don't link digital accounts together
  - don't "login with..." in different apps or services
- If you can, use one email alias per account
  - Use a password manager to keep each accounts' password

## Navigation with maps

- OsmAnd
- Maps.me

# Some Final Thoughts, going further...

- Interoperability
- Usability and Privacy don't exclude each other
- Cloud products
