## WHIZARD 3.0: Status and News

*Thursday, 18 March 2021 12:10 (20 minutes)*

WHIZARD is a multi-purpose Monte Carlo event generator very well suited for the simulation of lepton collider physics.

In this talk, we are reporting on the recent theoretical and technical developments with respect to the implementation of next-to-leading-order perturbative corrections and the UFO interface to use models beyond the Standard Model within WHIZARD.

### Time Zone

Europe/Africa/Middle East
