

International Workshop on Future Linear Colliders, LCWS2021

Monday, March 15, 2021

N3: Beams for Accelerator and Detector R&D and Irradiation - Online Conference (10:00 PM - 1:00 AM)

-Conveners: Yoshihisa Iwashita; Mark Hogan; Steinar Stapnes

time	[id] title	presenter
10:00	P205 Welcome	
10:05	P206 A programme with a low energy electron beam - CLEAR at CERN	FARABOLINI, Wilfrid
10:25	P207 Beam requirements for plasma acceleration R&D, examples from LNF planning and CERN studies	MUGGLI, Patric
10:45	P208 Testbeam and irradiation facilities	STANITZKI, Marcel
11:05	P209 Exploring Strong Field QED with ILC Beams	SEBASTIAN, Meuren
11:25	P300 Brilliant muon beam production at the ILC	YAMAZAKI, Takayuki
11:45	P301 Photon science using gamma-rays in future linear colliders	HAYAKAWA, Takehito
12:05	P303 New Research Opportunities with Ultrahigh Intensity Lasers at the ILC	KOGA, James
12:25	P300 A high luminosity SC e+e-twin linear collider with energy recovery	TELNOV, Valery Prof. TELNOV, Valery
