## **Spatial impact analysis of Large Research Infrastructures: A case study on SRF cavities**

*Tuesday 29 June 2021 11:35 (25 minutes)*

What is the spatial footprint of the socio-economic benefits of High-Energy Physics Research Infrastructures? This presentation discusses the preliminary stages of LSE research on FCC's potential spatial socio-economic benefits by focusing on SRF cavities production, one of the key technologies for the FCC-ee.
