

## Technical Hints for the Exam Participation

- Taking the exam via smartphone or tablet is not recommended.
- You need an internet-enabled computer with a current version of Chrome or Firefox. Safari is not officially supported as a browser.
- We recommend a minimum screen size of 12 inches and a minimum resolution of 1024 x 768. If you use a smaller monitor size or a lower resolution, make sure that all tasks are displayed correctly when you start the examination. Otherwise, it may help to reduce the page zoom ("CTRL"&"+") or deactivate the question list.
- Physical keyboard with German or English layout (depending on the exam language).
- You need stable, fast internet access for the entire duration of the exam.
- Disable the popup blocker in the browser
- Content-Filter like AdBlock/Anti-Virus, etc. should not hinder communication.
- Activate Java Script (Active Scripting).
- Allow http-Session-Cookies.
