

WLCG Operations Coordination News

Simone Campana (IT-SDC)
Andrea Sciaba (IT-SDC)

Task Forces

- We propose to cancel these (previously foreseen) task forces
 - Data access (e.g. Tier-1 WN in the OPN): limited interest from the experiments, requires significant changes to the site network infrastructure, most probably no need for WLCG coordination
 - We will do a survey and document the current situation
 - Dynamic Data Placement: interest of CMS and LHCb, but still at the development phase. Will re-discuss if needed once it reaches production
